**CAPhO 2026**

Merck Breakfast Symposium

Saturday,  
April 25, 2026

Salon A&B – TCU Place,  
Saskatoon, SK

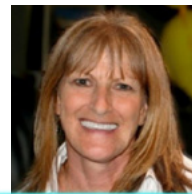

6:45 - 8:15 am CST  
Breakfast will be served.

Join us to explore how subcutaneous (SC) immunotherapy is transforming Canadian oncology pharmacy practice. We'll dive into the latest evidence, practical strategies, and real-world insights. Don't miss your chance to be part of the conversation!

### Learning Objectives

- Review the key evidence on how SC administration of anti-cancer drugs can improve healthcare system efficiency and patient outcomes
- Implement practical strategies for integrating SC anti-cancer therapies into clinical practice, including protocol development, shared decision-making, patient scheduling, and transitioning from IV to SC administration
- Apply real-world evidence and patient perspectives on SC anti-cancer therapies to identify opportunities to enhance care in the Canada

### Panelists:

#### Kathleen Barnard
