A.C.T.I.O.N in Myeloma:

Applied Clinical Thinking In Oncology Navigation

This course is available in both English and French. This 1-hour program focuses on optimizing eye-related side effect management and patient counselling for patients receiving treatment for relapsed/refractory multiple myeloma with antibody-drug conjugates (ADCs).

▶ **EXPERT SPEAKERS:**

Michelle Forman
RN, CON(c)
Oncology Nurse
Burnaby Cancer Centre
📍 Burnaby, BC

Tina Crosbie
BSc (Pharm), ACPR, RPh
Clinical Pharmacist, Hematology
The Ottawa Hospital
📍 Ottawa, ON

▶ **LEARNING OBJECTIVES:**

Share real-life insights on factors that contribute to **treatment decision-making when initiating new myeloma therapies.**

Apply practical considerations related to **dosing and administration of novel anti-BCMA therapies**, including antibody-drug conjugates (ADCs), to support **evidence-based, patient-centred treatment management.**

Demonstrate how to **streamline collaboration with other healthcare professionals**, with a focus on **adverse event management.**
