

2026 CAPHo Conference Symposium | TCU Place Saskatoon

Beyond Borders:

A Multidisciplinary Strategy for Optimizing Antibody-Drug Conjugates in Multiple Myeloma Care

Friday, April 24, 2026 | 7:00 – 8:30 AM CET

YOU'RE INVITED!

Join us for an interactive and dynamic panel discussion on optimizing care for RRMM patients treated with BCMA targeting ADCs. Experts will share practical tips on multidisciplinary team communication and managing eye related side effects, including using ophthalmic exams to guide dose adjustments.

LEARNING OBJECTIVES

- Identify the distinct adverse event profile associated with ADCs used in multiple myeloma.
- Apply coordinated patient care models to strengthen communication strategies and appropriately manage dosing changes and treatment holds as care team—including oncologists, eye care providers (ECPs), and pharmacists.
- Describe the pharmacist's role in patient counseling, particularly in helping patients manage ocular and other treatment-related effects.
- Discuss practical approaches and workflow management to optimize scheduling, ADC administration, and continuity of care.

PANEL DISCUSSION FACULTY

Dominic Duquette,
BPharm, MSc
Clinical Pharmacist, Centre
de recherche du CHU
Québec, Université Laval

Dr. Jacob Rullo,
MD, PhD, FRCSC
Ophthalmologist
Assistant Professor
Research Clinician

Dr. Rami Kotb
Hematologist/Oncologist
Associate Professor,
Department of Internal
Medicine
