

What is the main purpose: (Half-page summary)

When I think back to when I first started brain storming for this presentation I remember thinking “I have no idea what I’m going to talk about” and it wasn’t until Feb 25th 2024, I was literally in the bath having a “self-care Sunday” that I realized my purpose is to encourage people anything is possible – that we can unlearn and relearn – that we are allowed to change our minds.

It wasn’t until that bath when I heard over the tv, the Benjamin Franklin quote “failing to prepare, is preparing to fail”. When I realized - *I think that’s why it was so hard to start - because I didn’t understand the role myself.*

That is when I came up with “*Enhancing Cancer care for all Canadians begins with research, innovation, and technology.*” “All I want is for you to leave here today asking yourself: How does your Pharmacy education and expertise play a pivotal role in enhancing Oncology Informatics?
